Job Title	Digital Developer IV
Short Description	We are seeking a full stack C# developer to join our Information Technology team. This position will be involved in the entire software development lifecycle and will utilize various technologies, such as, Flowgear, Outsystems and Azure SaaS. This position will also be responsible for recommending new technologies for use at Corporate One.
Full Description	About Corporate One: We are a leading wholesale financial services provider to more than 700 of America's credit unions. As a trusted and highly respected investment, funding, and payment solutions partner to credit unions for more than 70 years, Corporate One has developed innovative solutions for credit unions throughout our history. We, along with our subsidiary companies, Lucro Commercial Solutions, Accolade Investment Advisory and Sherpa Technologies are committed to our member credit unions and their mission to help their communities thrive. Why Should You Apply? Employment with Corporate One includes being part of a collaborative environment where every individual is part of a team, making a difference to credit unions and the communities they serve. We are dedicated to improving the financial lives of others. You'll enjoy a friendly and casual work environment where personal autonomy, self-initiative, innovative thinking, and continuous learning are highly valued. We are proud to have an average tenure of 10 years! Corporate One Federal Credit Union is committed to creating a diverse environment and is proud to be an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, gender, gender identity or expression, sexual orientation, national origin, disability, age, or veteran status. Want to know more? Main Responsibilities: •Work closely with the Agile team to collaborate on proof of concepts, industrialization of the concepts, and the delivery of the concepts in a digital framework for quick release cycles to achieve a targeted minimal viable product (MVP). •Design and develop business applications and system solutions which include test plans, and results for unit testing, safety and soundness testing, regression testing and system integration testing, following corporate architecture, design, and coding standards. •Fully support and participate in all stages of agile methodology include daily standup, story planning, backlog grooming, and demonstration. Provide honest and critical feedback during all stages of the process to ensure better development practices and successful solution implementations.

	•Make recommendations to the team for environmental/architectural changes that will increase the stability or improve the performance of Corporate One's systems and applications. Desired Qualifications: •Bachelor's degree in Computer Science, Engineering, or related field or equivalent combination of education and experience. •Strong practical knowledge of Agile/Scrum methodology •3 years of related experience with mobile application development and all phases of software development lifecycle and 4 years of experience with application software solution design •Hands-on experience in C#, ASP.NET Core, Microsoft.Net framework, .Net Core, JavaScript, CSS, HTML. Exposure to OutSystems, preferred, experience with Flowgear is a plus.
Education	Bachelor's degree in Computer Science, Engineering or related field or equivalent combination of education and experience.
