We offer a friendly and casual environment and encourage innovation, collaboration, continual learning and accountability. Corporate One offers competitive compensation, liberal 401(k), quality health and ancillary benefits, and generous PTO and holiday schedules. If you want to be a part of our mission of serving credit unions nationwide, apply today.

POSITION PURPOSE:

The purpose of this position is to design and develop digital applications, micro services and backend processes utilizing technologies such as low code/no code mobile application development platforms (MADP), low code/no code integration platforms as a service (iPaaS) and a variety of other frameworks, while working as a member of a development team using Agile methodology. A person in this role will function as a contributor and collaborator to gather, analyze, and breakdown requirements into detail tasks to achieve rapid application development to produce Minimal Viable Product for rapid release cycle. A person in this position will utilize relevant design patterns, frameworks and data models in the design, development and implementation of small and large-scale software solutions consisting of, but not limited to, reusable code, web services, web sites, distributed applications, and large databases.

Full Description**ESSENTIAL DUTIES AND RESPONSIBILITIES:**

- Works closely with the Technical Delivery Manager and the Agile team to collaborate on proof of concepts, industrialization of the concepts and the delivery of the concepts in a digital framework for quick release cycle to achieve targeted Minimal Viable Product (MVP).
- Uses modern technologies including low-code/no-code, iPaaS and DevOps tools, designs and develops digital applications. Designs and develops business application and system solutions including test plans and testing results for unit testing, safety and soundness testing, regression testing and system integration testing following corporate architecture, design, and coding standards.
- Fully supports and participates in all stages of Agile methodology include daily standup, story planning, backlog grooming and

demonstration. Provide honest and critical feedback during all stages of the process to ensure better development practices and successful solution implementations.

- Makes recommendations to the team for environmental/architectural changes that will increase the stability or improve the performance of Corporate One's system and applications.
- Fully documents necessary aspect of the work for easy maintenance, transition and governance needs.
- Works closely within and outside of the team for ideation, vendor evaluation and research work; keep abreast of the new technologies and trends to support the innovation aspect of the job.
- Flexible to perform other duties and projects as assigned.

QUALIFICATIONS:

- Education: Bachelor's degree in Computer Science, Engineering, or related field or equivalent combination of education and experience. Strong practical knowledge of Agile/Scrum methodology.
- Experience: Minimum of three years of related progressive experience with reactive application development using low-code development platform, OutSystems and Flowgear preferable. Experience in CMS system desired, Kentico MVC preferred. Minimum of three years of experience with performing requirements analysis and application software solution design.
- Specific Job Knowledge and Skills Required: Excellent team player and collaborator, who can breakdown requirements into detail tasks to develop and implement the software and work Agile process. Ability to work well under stress. Strong analytical skills. Ability to multi-task. Excellent communicator with the ability to translate business data and requirements into technical specifications. Knowledge with mobile application development frameworks. Knowledge with both client/server application development.
- Technology Skills Required: Trained or experienced in two or more of the following application development environments:
 - o Azure SaaS functions.
 - o Mobile Application Development Design Patterns. Experience with OutSystems a plus.
 - o iPaaS/Enterprise Service Bus Integration Architecture. Experience with Flowgear a plus.
 - o Web Services, RESTful services, Object Oriented design pattern
 - o Multi-Factor Authentication Concepts and Designs
 - o JQuery/Javascript/CSS/HTML
 - o Client side frameworks
 - o Microsoft .Net Framework, .Net core
 - o C#, ASP .Net

- o Windows Communication Foundation
- o Windows Workflow Foundation
- o Complex Stored Procedures
- o Database integration with Oracle, SQL
- o Knowledge of SSIS/SSRS
